<META NAME="DC.Description" CONTENT="This service is provided by the Nordic Metadata Project in order to assure good support for the creation of Dublin Core metadata to the Nordic "Net-publisher" community. If you use the metadata created by this form and follow our examples, term lists and recommendations, your HTML documents will carry high quality metadata. To demonstrate the usefulness of providing metadata, the "Nordic Web Index" will properly index your page when published and soon offer improved searching possibilities and precision to all users on the Internet. The result: your pages will be found more easily and correct.">
